

# GRUNDFOS CRE-DP

## AN ALL-IN-ONE SOLUTION BRINGING PROPORTIONAL DIFFERENTIAL PRESSURE TO YOU

The CRE-DP expands Grundfos' offering by using proportional pressure to make installation even easier, and for your building to perform even better.

### Key Features and Benefits

- proportional pressure control eliminates the need to install a differential pressure sensor remotely - less labor, less installation time, less costs
- Integrated frequency drive saves energy by up to half compared to fixed speed pumps
- Out-of-the-box pre-configured capability, programmed and ready for installation and operation
- Multiple control modes featuring constant curve, constant and proportional differential pressure
- Innovative design to minimize equipment footprint and speed up installation
- SCADA communications capable with CIM/CIU
