

GRUNDFOS
SERVICE &
SOLUTIONS

NATIONWIDE SERVICE COVERAGE

Grundfos offers full-range, nationwide service for all pumps and pump systems through our network of Grundfos Factory Service Centers and Authorized Service Partners.

Our certified service technicians and engineers use digital analysis and the latest testing procedures to provide a practical, quality alternative to costly equipment replacement. As the original equipment manufacturer (OEM) we specialize in Grundfos brand pumps including PACO, Yeomans, Chicago and Morris, but can also provide repair services for any other brand.

From commissioning and maintenance to repair and condition monitoring we are committed to delivering

quality service and products that reduce downtime and energy consumption.

- Service capabilities for all pumps
- Nationwide on-site/in-shop repair by Grundfos Factory Certified Service Technicians and Engineers
- Quick response to emergency repairs
- Full 12-month warranty on all repair services
- Experienced personnel with modern testing and repair equipment
- Full-range service provider, from commissioning through end-of-life replacement

- Engineered for optimal performance and reliability
- Meet exact specifications and backed by rigorous testing
- Full line selection available for quick shipments and emergency situations

ENERGY OPTIMIZATION

Acquiring a pump system isn't your biggest investment - keeping it running is. The energy consumed by a pump accounts for 85% of its total life-cycle costs. Energy optimization services provide you with an overview of these costs and facilitate decisions on pump replacement and options for reducing energy consumption.
