Communication interface for **LON**
– easy integration in building automation

The CIM/CIU 100 and CIU 110 is a standard interface for data transmission between a LON network and a Grundfos pump or controller. It makes data exchange possible between Grundfos pumping systems and a building management system.

The communication interface is fully compliant with the standard LONmark functional profile 8120 "Pump Controller", ensuring interoperability with other LON devices.

The communication interfaces have been certified as conforming to LonMark Application Layer interoperability guidelines 3.4.

The interface module can be installed as an internal add-on or as a wall-mounted unit where internal connection is not supported. The wall-mounted unit is equipped with a 24-240 VAC/VDC power supply.

In addition to LON, interface modules are also available for GENIbus, BACnet, Modbus, Profibus, GSM and other systems.

**CIM 100 add-on module**
The CIM 100 is an add-on communication module installed internally in 11-22 kW Grundfos E-Pumps. CIM 110 add-on module is used for Hydro Multi-B.

**CIU 100 / CIU 110 wall-mounted/DIN-rail unit**
The CIU 100 and CIU 110 with internal power supply are for Grundfos products that do not support the add-on module (CIU 110 is used for Hydro MPC/Control MPC).

**Supported products**
- MAGNA/UPE Circulators*
- Dry-running E-pumps: CRE/CRNE/CRIE, MTRE, CME, TPE Series 1000/2000, NBE/NKE
- CUE Motor drive for pumps
- Multi Pump Controller: Control MPC*
- Boosters: Hydro Multi-E and Hydro MPC* and Hydro Multi-B
  * additional add-on GENIbus module required

**Advantages at a glance**
- Supports a wide range of Grundfos products
- Uses 8120 – Pump Controller functional profile from LONmark
- Modular design – prepared for future needs
- 24-240 VAC/VDC power supply in CIU
- Self-documentation strings for fast installation
